Professional Summary

Full-Stack Developer specializing in scalable, high-performance applications with React.js, Next.js, Node.js, Express.js, and MongoDB. Experienced in building production ready AI systems using RAG, LLM integrations, and real-time architectures, delivered on AWS and Docker.

Technical Skills

- **Languages:** C++, JavaScript, TypeScript
- **Frontend:** HTML, CSS, React.js, Next.js, Tailwind CSS, Shadcn UI, Motion, Redux
- **Backend:** Node.js, Express.js, Mongoose, Socket.IO, REST APIs, JWT Auth
- **Database:** MongoDB, MySQL, Vector DB (Pinecone)
- **AI / Data:** RAG, Embeddings, LLM Integration, Agents, LangChain
- **Cloud & Tools:** AWS, Docker, Git, GitHub, VS Code, Postman

Experience

Full Stack MERN Intern | IPAGE Group (IPAGE UM SERVICES PVT LTD)

Hyderabad, India | September 2025 – February 2026

- Built and deployed end-to-end full-stack features using the **MERN stack** across a multi-module production project, including responsive UI components, **authentication flows**, and interactive dashboard modules for dynamic data visualization and management.
- Designed and integrated multiple **RESTful API endpoints via AWS API Gateway**, enabling secure communication between frontend applications and scalable serverless backend services.
- **Engineered** serverless backend workflows using **AWS Lambda** and **AWS DynamoDB** to handle structured data operations and real-time updates, reducing reliance on traditional server infrastructure and improving system scalability.

Projects

AI Customer Support Chatbot — [GitHub](#) | [Live Demo](#)

Dec 2025 – Jan 2026

- Designed a full-stack AI-powered customer support platform using **Next.js 16** (App Router), **React 19**, **TypeScript**, and **MongoDB**, featuring a production-ready embeddable chat widget deployable across external websites in under 10 minutes.
- Integrated **Google Gemini AI** for context-aware response generation using custom business knowledge bases, enabling personalized and brand-aligned customer interactions.
- Architected secure **REST API** routes and implemented enterprise-grade authentication with **Scalekit SDK**, ensuring scalable access control and data protection.
- Engineered a dynamic chatbot configuration system allowing businesses to customize AI personality, tone, and training data enabling full chatbot deployment in **under 5 minutes** without any code changes.

Doctor Appointment Booking Application — [GitHub](#) | [Live Demo](#)

Sep 2025 – Oct 2025

- Engineered a full-stack doctor appointment system using **React.js**, **Redux**, **Node.js**, **Express.js**, and **MongoDB**, featuring role-based dashboards for doctors and admins.
- Integrated secure **JWT-based authentication**, appointment scheduling, and **Razorpay** for online payment processing.
- Managed file uploads using **Multer** and **Cloudinary**, reducing manual effort by **50%**.
- Increased booking efficiency by **approximately 40%**, supporting **over 100 users** through backend optimization and streamlined workflows.

Education

Diploma in Computer Science and Technology

2023 – 2026 (Expected)

Berhampore Polytechnic College, West Bengal

3rd Year, 6th Semester | **GPA: 8.3 / 10**

Certifications & Achievements

- **Solved over 150 problems** on data structures and algorithms on LeetCode.
- JavaScript (ES6+) Certification Complete Coding.
- React & Redux, Redux-Toolkit Certification, Knowledge Gate.
