Professional Summary

Full-Stack Developer specializing in scalable web applications using React.js, Next.js, Node.js, Express.js, FastAPI, MongoDB, and PostgreSQL. Experienced in building production-grade AI systems with RAG and LLM integrations, and in serverless architectures on AWS, with Docker for containerized deployments.

Technical Skills

- **Languages:** C++, Python, JavaScript, TypeScript
- **Frontend:** HTML, CSS, React.js, Next.js, Tailwind CSS, Shadcn/UI, Motion, Redux, Tanstack Query
- **Backend:** FastAPI, Pydantic, Node.js, Express.js, Socket.IO, REST APIs, JWT Auth
- **Database / ORM:** MongoDB, PostgreSQL, Redis, Vector DB, SQLAlchemy, Alembic, Prisma, Drizzle, Mongoose
- **AI / Data:** RAG, Embeddings, LLM Integration, Vector Search, LangChain, MCP
- **Cloud & Tools:** AWS, Docker, Vercel, Git, GitHub, Postman, Claude Code

Experience

Full Stack MERN Intern | IPage Group (IPAGE UM SERVICES PVT LTD)

Hyderabad, India | *September 2025 – February 2026*

- Built and deployed **12–15 full-stack features and dashboard modules** across a multi-module production platform, including AI template generation workflows, professional/company/event template management, authentication, token/credit management, payments, lead management with real-time chat, publishing, analytics, and admin approval workflows.
- Designed and integrated **25–30 RESTful API endpoints** via **AWS API Gateway** covering authentication, template generation, payments, lead management, and admin operations, implementing **pagination**, **filtering**, and **query optimization** to support efficient data access across the platform.
- Engineered serverless backend workflows using **AWS Lambda** and **AWS DynamoDB** to process **300–500+ active records** across template categories, using optimized queries and **serverless auto-scaling** to handle structured data operations and real-time updates without managing traditional server infrastructure.

Projects

SupportAI | GitHub | Live Demo — *Dec 2025 – Jan 2026*

- Built a full-stack AI-powered customer support platform using **Next.js**, **LangChain.js**, **MongoDB**, and **Pinecone**, featuring a **RAG pipeline** for context-aware response generation from custom knowledge bases.
- Integrated **Notion** as a knowledge source, enabling businesses to power chatbot responses directly from their existing documentation without manual re-entry.
- Implemented **multi-turn conversational memory** within visitor sessions, resolved production file-upload failures by replacing **pdf-parse** with **unpdf**, and built **skeleton loading states** for a smoother UX during AI response generation.

Doctor Appointment Booking | GitHub | Live Demo — *Sep 2025 – Oct 2025*

- Engineered a full-stack doctor appointment booking system using **React.js**, **Redux**, **Node.js**, **Express.js**, and **MongoDB**, featuring role-based dashboards for doctors and admins.
- Implemented secure **JWT-based authentication**, appointment scheduling, and **Razorpay** integration for online payment processing.
- Handled file uploads using **Multer** and **Cloudinary**, reducing manual upload effort by **50%**, and improving booking efficiency by approximately **40%**, supporting over **100 users** through backend optimization and streamlined workflows.

Education

Maulana Abul Kalam Azad University of Technology, West Bengal (MAKAUT, WB) — *2026 – 2029*

Dumkal Institute of Engineering & Technology | B.Tech in Computer Science and Engineering (CSE) | 2nd Year

West Bengal State Council of Technical & Vocational Education and Skill Development — *2023 – 2026*

Berhampore Polytechnic College | Diploma in Computer Science and Technology (CST) | GPA: 7.5

Certifications & Achievements

- Solved over **150 problems** on data structures and algorithms on LeetCode.
- **JavaScript (ES6+)** Certification from Complete Coding.
